

The COMPLETE ENERGY SAVING LINE!

**SAVE MONEY  
SAVE ENERGY**

**POLYURETHANE FOAMS**

• Higher Yield • Air-tight Insulation • Professional Grade

Increase your  
energy efficiency....  
USE TVM  
POLYURETHANE FOAMS!

# TVM Straw Foam

**TVM Straw Foam** is a one-component insulating foam that is dispensed using an easy to use straw attachment. By using this straw attachment on this lightweight can of foam, you instantly have a simple solution for your smaller scale gap, crack and void filling needs. **TVM Straw Foam** effectively blocks air infiltration while adding thermal insulation value.

## Advantages

- Fast curing
- High yield formulation
- Water resistant when cured
- Sandable & paintable
- Excellent adhesion to most substrates

## Applications

- General gap, crack & void filling
- Sound deadening
- Heating & air conditioning install/repair
- Sealing around electrical outlets
- Insulating

# TVM Door & Window Straw Foam

**TVM Door & Window Straw Foam** is a one-component insulating foam that is dispensed using an easy to use straw attachment. By using this straw attachment on this lightweight can of foam, you instantly have a simple solution for all of your Door & Window sealing needs.

## Advantages

- Fast curing
- High yield formulation
- Excellent adhesion to most substrates

## Applications

- General gap, crack & void filling
- Heating & air conditioning install/repair
- Insulating

# TVM Cold Weather Gun Foam

**TVM Cold Weather Gun Foam** has been formulated for use in temperatures of as low as 14°F (-10°C). TVM Cold Weather Gun Foam will expand and cure in low temperature conditions to give an airtight, water resistant seal. TVM polyurethane foams do not contain CFC propellants, making it an ozone friendly solution for your sealing and insulating needs.

## Advantages

- Will expand and cure at temperatures as low as 14°F (-10°C)
- High thermal and acoustical insulation
- Excellent adhesion to most substrates

## Applications

- General gap, crack and void filling
- Heating and air conditioning install and/or repair
- Draft elimination
- General insulation

# TVM FireBlock Gun Foam

**TVM FireBlock Gun Foam** is a one-component fireblock for wood-frame constructions. This method of fireblocking is used in place of other materials such as mineral wool, fiberglass and caulks for their ease of use and high yield. This specialty product does the job of 30 tubes of traditional caulk, easily and effectively.

## Advantages

- Excellent adhesion on most substrates
- High yield
- Efficient seal against water, smoke and toxic gases
- Non-slump

## Applications

- In annular spaces around penetrations in wood frame constructions
- As stated in section R602.8 of the International Building Code; fireblocking is required in various locations in wood frame constructions

Customer Service: 1.888.484.4TVM

## TVM Low Expansion Gun Foam

**TVM Low Expansion Gun Foam** is a one-component insulating foam that is dispensed using one of TVM's professional dispensing guns. This application method gives the applicant full control of the product flow (bead) and obtain more product out of a can. **TVM Gun Foam** can also reach areas in which other methods cannot. **TVM Low Expansion Gun Foam** effectively blocks air infiltration while adding thermal insulation value. *Available In Yellow & Black*

### ● Advantages

- Fast curing
- High yield formulation
- Excellent thermal & acoustical insulation
- Water resistant when cured
- Sandable & paintable
- No shrinkage once cured
- Excellent adhesion to most substrates

### ● Applications

- Sound deadening
- Spa repair
- Black foam for decorative landscaping
- Heating & air conditioning install and/or repair
- Sealing around electrical outlets
- Manufactured housing assembly

## TVM Door & Window Gun Foam

**TVM Door & Window Gun Foam** is specifically formulated to expand just enough to produce an effective seal between the door or window frame and its coarse opening. Other polyurethane foams will cause damage to the door and window frame due to the high pressure exerted on the frames during expansion of the foam. **TVM Door & Window Gun Foam** eliminates this problem with its low pressure formulation and has been tested to give the highest yield in comparison to other products on the market while providing superior seal, making your door and window system more energy efficient. **TVM Door & Window Gun Foam** has been tested in accordance to AAMA specifications.

### ● Advantages

- Easily controlled bead size
- Fast curing
- Low pressure
- High yield formulation
- Water resistant when cured
- Excellent adhesion to most substrates

### ● Applications

- Windows and door installation
- General insulating
- Draft elimination
- General plumbing applications
- Sealing around electrical outlets

LOW  
PRESSURE

## TVM PU Foam Cleaner and Dispensers

**TVM Polyurethane Foam and Gun Cleaner** is an acetone based cleaning solvent developed to clear away uncured polyurethane foam from unwanted places. **TVM Foam Cleaner** can also be used to clean and maintain **TVM Foam Dispensers**.

### ● Advantages

- Dissolves uncured foam on contact
- Clears gun basket of foam

### ● Applications

- General cleaning
- Foam dispenser maintenance

**TVM Polyurethane Foam Dispensers** offer professional grade reliability and unmatched flow control. TVM offers 2 grades of guns to suit your needs.
